

## CUSTOM POLYCLONAL ANTIBODY PRODUCTION SERVICES

**SCANTIBODIES**

### SCANTIBODIES, THE RIGHT CHOICE FOR YOUR POLYCLONAL ANTIBODY PRODUCTIONS

Scantibodies produced the first affinity purified goat antibodies in 1982 for the first intact PTH and in 1998 for the first whole PTH assay.

With over **40 years of experience** in the production and purification of polyclonal antibodies, Scantibodies offers its customers not just our services but our expertise. Whether you are looking to transfer an already existing program or if you are in the process of starting a new one, our knowledgeable staff is ready to assist you.

Housing **up to 1000 rabbits, 1200 goats and 500 sheep** at our beautiful ranch in Ramona, CA, we pride ourselves in the first class treatment of our animals. This is further demonstrated by our Assessment and Accreditation of Laboratory Animal Care International (AAALAC) accreditation that was awarded to Scantibodies in 2012.

### YOUR PRODUCT THE WAY YOU WANT IT

The initial set-up fee for custom polyclonal antibody production includes the purchase price of the animals for your program. This means that you own the animals and are kept informed of the animal's health, including decisions regarding the animal's health. Whole blood, plasma or serum is shipped directly to you according to your specific program protocol. We also offer purification services if you would prefer to leave this task to our staff of purification experts, thus freeing up your internal resources for other projects.

## CUSTOM POLYCLONAL ANTIBODY PRODUCTION SERVICES

### SWITCHING MADE EASY

Switching to Scantibodies for your polyclonal antibody production is a simple process, which starts with completing our Custom Polyclonal Antibody Questionnaire with the details of your desired project. We will then review your requirements and provide you with a quotation for your program. Once you are ready to start, simply provide us with your purchase order and your antigen or we can provide the antigen according to your specifications for immunization and we will handle the rest!
